National Interagency Coordination Center Incident Management Situation Report Friday, April 21, 2017 – 0800 MT National Preparedness Level 1

National Fire Activity (Apr. 14 - Apr. 20)

Initial attack activity:	676
New large incidents:	13
Large fires contained:	18
Uncontained large fires:**	7
Area Command Teams Committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

^{**}Uncontained large fires include only fires being managed under a full suppression strategy. **Link** to Geographic Area daily reports.

Southern Area (PL 3)

New fires:	458
New large incidents:	10
Uncontained large fires:	6
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

Cowbell, Big Cypress National Preserve, NPS. Transfer of command from IMT 2 (Parrish) to IMT 1 (Wilkins) occurred on 4/18. IMT is also managing the Parliament fire. Thirty six miles west of Weston, FL. Tall grass, southern rough and timber. Moderate fire behavior with flanking, backing and smoldering. Structures threatened. Area and trail closures in effect.

Parliament, Big Cypress National Preserve, NPS. Previously reported incident. Five miles northeast of Ochopee, FL. Southern rough and tall grass. Minimal fire behavior with creeping and smoldering. Area and trail closures in effect.

West Mims, Okefenokee National Wildlife Refuge. Georgia IMT 2 (Kline). Sixteen miles southeast of Fargo, GA. Timber and southern rough. Active fire behavior with flanking. Numerous structures threatened. Road and trail closures in effect.

Goshen Pass, Virginia DOF. Four miles southeast of Goshen, VA. Hardwood litter. Moderate fire behavior with uphill flanking.

Red Fox, National Forests in Florida. Eleven miles northeast of Lake City, FL. Southern rough. Minimal fire behavior. Last report unless significant activity occurs.

- * Lead Place, Florida Forest Service. Six miles south of Tarrytown, FL. Southern rough. Minimal fire behavior.
- * **30**th **St.**, Florida Forest Service. Nine miles east of Golden Gate, FL. Southern rough. Active fire behavior. Structures threatened. Last report unless significant activity occurs.
- * **Sod Farm 2**, Florida Forest Service. Eight miles west of Orange City, FL. Southern rough. Minimal fire behavior.

Additional wildfire information is available through the Geographic Areas at http://gacc.nifc.gov/

Predictive Services Discussion: Warm and dry conditions with low afternoon humidities will persist across Florida and Georgia into the weekend. A passing front on Sunday could produce a period of critical fire weather conditions with breezy winds and scattered storms interacting with overall dry air. Across the Southwest, warmer and drier than normal conditions will continue with little precipitation expected the next week. Looking north, most of California and Nevada will remain dry except across the northern portions of both states which will transition to an overall wet pattern as the spring storm tracks begin to push a little further north to be focused over the Pacific Northwest and the Northern Rockies. Expect continued overall cool and wet conditions to persist across these areas. Elsewhere across the CONUS, near normal conditions will continue for both precipitation and temperatures except across the mid-south where above normal precipitation is expected. In Alaska, high pressure will linger over the state's interior for much of the next week. While near-normal temperatures are expected, precipitation will be below average.

http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

COMMON DENOMINATORS OF FIRE BEHAVIOR ON TRAGEDY FIRES

Weather / Fire Behavior Category

Five common denominators that contribute to accidents/incidents have been identified through studies of tragedy fires. It is important for firefighters to readily recognize the following common denominators so that future tragedies can be prevented:

•	Most incidents happen on smaller fires or on isolated portions of larger fires.
•	Most fires are innocent in appearance before unexpected shifts in wind direction and/or speed results in flare-ups or extreme fire behavior. In some cases, tragedies occur in the mop-up stage.
•	Flare-ups generally occur in deceptively light fuels, such as grass and light brush.
٠	Fires run uphill surprisingly fast in chimneys, saddles, gullies, and on steep slopes.

Some suppression tools, such as helicopters or air tankers, can adversely affect fire

behavior. The blasts of air from low-flying helicopters and air tankers have been known to
